

# Planter boxes

## Welcome

Incorporating plants into building facade designs is becoming increasingly popular, bringing nature into the urban world. Outdoor living walls bring health and environment benefits along with aesthetic delight.

In this brochure, we explore the value of integrated planter boxes and how to specify them in your project. We outline everything you need to know when specifying planter boxes, including relevant technical information and inspiration.

Aurae planter boxes enable you to integrate plants into your project's façade. Use our bracket systems to fix the planters to the building and use aluminium grating, stainless steel cable or fixed vertical fins to promote plant growth.

Project: Hobsonville TU4  
Architect: Construkt Architects  
Builder: Fletcher Living

## Benefits of integrated planter boxes

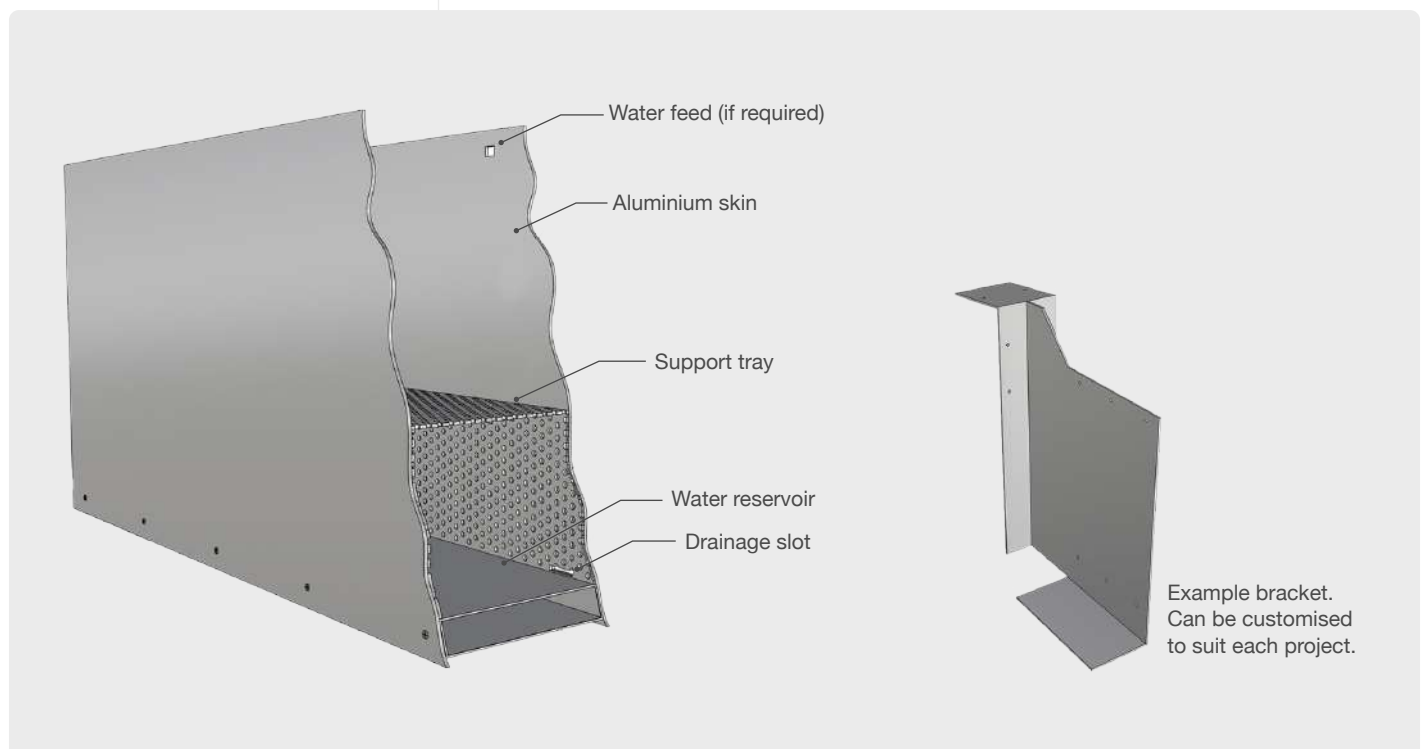

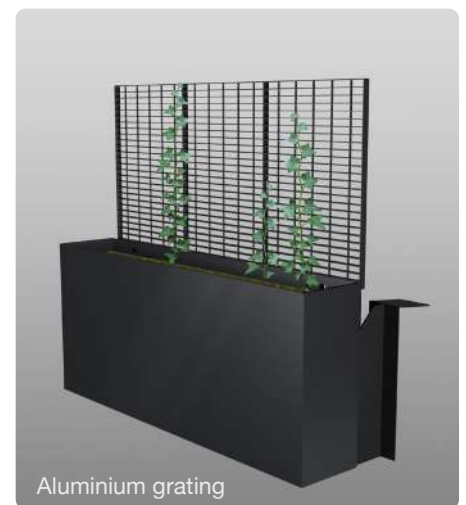

- Able to be installed at different levels bringing plant growth above ground level.
- Provide above ground apartments with a vegetable garden.
- Bring nature to high & medium density living.
- Can be used as a balcony balustrade.

## Aurae aluminium planter boxes

Features of Aurae aluminium planter boxes include.

- Built-in water reservoir systems to keep soil moist and promote plant growth.
- Engineered to AS/NZS standards, with producer statements available upon request.
- Can be integrated with cable, louvre fins and grating systems for creepers to grow on.
- Water feeds can be included.
- Powdercoat finish.

## Custom planter boxes

If you can't find the planter box design you're looking for, our in-house draughting team can customise one to meet your specifications. We can create custom planter boxes with varying shapes, sizes, depths, and climbing structures.

### We approach the design with a simple 3-step process:

1. Discuss your project to understand your requirements and get agreement on initial designs.
2. Complete the shop drawings and get the design signed off.
3. If required, we will complete PS1 and engineering calculations.

## Working with us

Aurae is a New Zealand based company that makes houses look good. With our inhouse knowledge, we can design, engineer, manufacture and install the louvre and façade products you need to make your project look good.

All products are fully engineered to AS/NZS standards with producer statements available upon request.
