KEY:	Light Grey shading = Acceptable span		Dark Grey shading = Over recommended span		Black shading = Unsafe	

*'Over Recommended Max Span' is the point at which Aurae considers the deflection as 'unsightly'

*Deflection values assume operable louvres in the closed position (therefore no porosity factor)

*Deflection values assume simple support and do not take into account the integrity of any fixing.

*Deflection values assume a horizontal louvre (not tilted)

*Please contact Aurae if your scenario is : Above 10m height, or is in a specific design location
